## Experience

**Google** **San Francisco, CA**
*Software Engineer (Senior Software Engineer as of April 2021)* *January 2018–present*

- Member of the Cobalt on Fuchsia team (https://fuchsia.googlesource.com/cobalt) (rust)
  - Worked on initial design of the privacy-preserving metrics platform Cobalt
  - Coordinated the migration of backend services from GCS to internal Google services
  - Orchestrated a major refactor of core c++ code to increase flexibility and maintainability
  - Built out the client side of the Cobalt platform to enable it to run on all first generation Google home hubs
- Member of the Network Policy for Fuchsia team (c++)
  - Collaborated with other teams to support multiple active networks on a fuchsia device, and policy to route between them
  - Designed and implemented early work to support IETF TAPS for Fuchsia networking

**Google** **Mountain View, CA**
*Site Reliability Engineer* *August 2015–January 2018*

- Member of Bandwidth SRE team
  - Part of the team that managed Google's global-scale SDN stack
  - Improved systems for rolling out changes to the stack thereby reducing toil
  - Performed on-call rotation duties with 15 minute response time
- Member of the Annealing SRE team
  - Built the basis of monitoring and deployment UI for annealing, an intent-based production management system
  - Collaborated closely with the development team in Zurich to create tools to make annealing performant and stable at scale

**Cisco Cloud Networking Group** **San Francisco, CA**
*Member of Technical Staff* *2013–2015*

- Member of the small team that built the MC74 phone
  - Built early-stage UI
  - Implemented many android firmware features including dual-partition firmware updates
- Core member of the Meraki mobile app team
  - Launched a mobile app for iOS and Android in under six months
  - Implemented much of the application's build process

**Meraki, Inc.** **San Francisco, CA**
*Engineering Intern* *May 2012–Aug 2012*

- Worked on the "special ops" team to build projects for large clients such as Acorr Hotels and Telmex

**Berkeley Simulation Software** **Berkeley, CA**
*Software Consultant* *2008–2013*

- Converted company website from php to Ruby on Rails

## Education

**UC Berkeley** **Berkeley, CA**
*BA, Computer Science* *2011–2013*

## Coding skills

**Compiled**: Rust, C++, C, Java, Fortran
**Mobile**: Fuchsia, Android
**Web**: HTML5, CSS, SQL, JavaScript, React, Rails
**Scripting**: Node, Python, Ruby, Bash
